Dear Public Service Commission,

Duke should quit investing in dirty, old energy like coal and nuclear, and actually invest in the cheaper renewable technologies its executives claim to support. I want the Carolinas to be more energy efficient and powered by local wind & solar that will employ thousands of Carolinians. Do you have no regard for our planet, your children and grandchildren will inherit the deeply wounded planet you are attacking with your thoughtless and reckless greed. Money will be of no use on a planet plagued by 100 year storms every other year.

PS I wouldn't mind a rate hike to help develop and deliver more energy efficient sources.

Sincerely,

Loretta Greene
